

Dear Hiring Team,

I am excited to apply for the SDE-1 (Full Stack Engineer) position. With over 3 years of experience building web applications using Node.js, React, TypeScript, SQL databases, and REST APIs, I have developed and delivered scalable, production-ready features across the full stack.

In my experience, I have worked on backend services, API development, database optimization, and frontend applications while collaborating closely with cross-functional teams. I enjoy solving technical challenges, writing maintainable code, and building products that create real value for users.

What excites me about this opportunity is the chance to contribute to a fast-growing product, take ownership of features end-to-end, and continue growing as an engineer while working with modern technologies.

Thank you for your time and consideration. I look forward to the opportunity to discuss how my skills and experience can contribute to your team.

Sincerely,

Yashshree Marghade
